I was asked to import data to SQL from multiple (15) Excel files, and each Excel file contained historical data with more than 200,000 rows. I could do it with 15 data flows and Excel connections in SSIS, but I didn't want to do it that way because I wanted to find a more efficient way than creating 15 data flows and Excel connections. I'm too lazy to create all those data flows and Excel ...
