In this section I lead students in notes concerning dimensional analysis while they fill in their notes and I present the PowerPoint.. While teaching students the steps of dimensional analysis I encourage students to use the method of underlining what they know, circling what they want, determining the equivalence statements, and then plugging in with dimensional analysis.

4 8 16 In the first call to the function, we only define the argument a, which is a mandatory, positional argument. In the second call, we define a and n, in the order they are defined in the function. Finally, in the third call, we define a as a positional argument, and n as a keyword argument.. If all of the arguments are optional, we can even call the function with no arguments.
