An education in the liberal arts and sciences prepares students for a wide range of careers. Although many people assume that one's major often translates into the equivalent career, the reality is that many employers favor skills wrought in liberal arts and sciences education and recruit job candidates from a pool of possible majors, emphasizing the degree completion over the major(s) used ...

The history of ornithology largely reflects the trends in the history of biology, as well as many other scientific disciplines, including ecology, anatomy, physiology, paleontology, and more recently, molecular biology. Trends include the move from mere descriptions to the identification of patterns, thus towards elucidating the processes that produce these patterns.

AET 101 Internal Combustion Engine Theory and Servicing. This is a theory/laboratory course designed to introduce the student to basic heat engine types, their physical configurations and various engine operating cycles.

Course Listing - Farmingdale State College

The standard approach to looking at fossils in the geological column is to assume that lower is older. Since the geologic column represents millions of years of Earth's history, then obviously the fossils in each of the layers must be the same age as the layer in which they are found. What is especially interesting is that the fossils do appear to show a progression from the most "simple" of ...

A Review of Walt Brown's book and hydroplate theory. Earth Boiled, Steamed and Roasted Another serious problem with Brown's model is the immense heat that would be generated during the proposed cataclysmic eruptions (Castagnoli, 2009; Morton, 2003), which would have literally boiled the oceans and steamed to death all animals and humans aboard Noah's ark.
