The obj directory is for intermediate object files and other transient data files that are generated by the compiler or build system during a build. The bin directory is the directory that final output binaries (and any dependencies or other deployable files) will be written to.. You can change the actual directories used for both purposes within the project settings, if you like.

Objection 1. It would seem that prophecy does not pertain to knowledge. For it is written (Sirach 48:14) that after death the body of Eliseus prophesied, and further on (Sirach 49:18) it is said of Joseph that "his bones were visited, and after death they prophesied." Now no knowledge remains in the body or in the bones after death. Therefore prophecy does not pertain to knowledge.
