Background. Gladwell initially covered business and science in The Washington Post before joining the staff at The New Yorker in 1997. Each of the articles first appeared in The New Yorker and was handpicked by Gladwell. The stories share a common theme, namely that Gladwell tries to show us the world through the eyes of others, even if that other happens to be a dog, hence the title.

A saw pit or sawpit is a pit over which lumber is positioned to be sawed with a long two-handled saw by two people, one standing above the timber and the other below. It was used for producing sawn planks from tree trunks, which could then be cut down into boards, pales, posts, etc. Many towns, villages and country estates had their own saw pits.

BEST ANSWER: The instructions say to use a 2"x12" or similar board under the guide for the initial trimming of the guide to your saw's blade position. So, I would say that a nominal 12" board is doable. From the edge of the board to the end of the guiding edge is 9", so if the center of your blade is at that limit you are probably going to be cutting to a point roughly 3" beyond that.
