A matter of Thalience: Karl Schroeder, Ventus and the 'successor to science'. They embody a theory of aerodynamics, and their computer minds use it to fly. If that theory were in some way 'merely subjective' or 'merely a human artifact', they wouldn't be able to take off, fly successfully, and land on their own.

In the case of Ventus, rather too long. The ideas behind this novel are some of the better that I've read in science fiction in quite a long time. The title world, Ventus, is covered with nanotech, seeded before the arrival of colonists to prepare the world, but when the colonists arrived, the nanotech didn't recognize them.
