Visual Studio includes a debugger that works both as a source-level debugger and as a machine-level debugger. It works with both managed code as well as native code and can be used for debugging applications written in any language supported by Visual Studio. In addition, it can also attach to running processes, monitor, and debug those processes. If source code for the running process is ...

For more information, see State messages in Configuration Manager.. The following example aligns and compares the Updatesdeployment.log and Statemessage.log files. Make sure that the logs refer to the same state message by aligning the same TopicID (green text). This clearly indicates that the two logs are referring to the same state message.

### **Description of state messaging in System Center ...**

Rdmartin, this is a prime candidate for a 503 debugging session, using the techniques described here: troubleshooting service unavailable errors. My guess is you installed the 32bit package on a 64bit machine, or a 64bit package on the 32bit machine, and the DLL is failing to load.

### **Fix problems with Visual Studio F5 debugging of ASP.NET ...**

By Tony Lugg . Good article. I'm not using MVC but my main project is a web application with Web API. The problem is, the build process does not take place in the Web API project unless I make a change in that project or explicitly tell it to rebuild, i.e. F5 sees no changes in the Web API project and so the build does not happen, and consequently no pre-build to build and copy my Angular ...
