The droplets crowd together and form a . Wind blows the towards the land. The tiny droplets join together and fall as precipitation to the .

Reading Comprehension - The Water Cycle

The water vapor is made up of clean water. This is one way that the water cycle keeps our water clean. Next, the water vapor mixes with the air and moves up into the sky. This is the first part of the water cycle. 3 The next part of the water cycle is called condensation. As the water vapor moves farther and farther up in the sky, it cools down.

The Water Cycle | edHelper.com

1. Hand out the Exploring the Water Cycle Student Handout. Students will use this throughout the rest of the lesson. 2. Show the water cycle video (slide 5). Students should be labeling their blank diagrams as they watch. This version of the water cycle is more complex than the one on their capture sheets.
