Balance is a compositional technique in photography that juxtaposes images within a frame so that the objects are of equal visual weight. When different parts of a photo command your attention equally, perfect balance is achieved. In photography, there are two main techniques of balance you should be aware of: formal and informal. We'll discuss the difference between each and how they can ...

I have to take contention to Carl's statement. From what I got out of this article was the intention to

explain depth of field as a tool to use to isolate or if wanted, blend in a subject as in nature shots where there isn't necessarily one defined subject and the image as a whole becomes the subject.
