Dell's Studio brand was a range of laptops and desktops targeted at the mainstream consumer market. The computers sit above Dell's Inspiron and below the XPS consumer lines in price and specifications. They differ from Dell's lower-end Inspiron models by offering slot-loading optical drives, media keys, more cover design options, faster processor options, HDMI and eSATA ports, LED-backlit ...

Any failing hardware component in your computer could cause your computer to unexpectedly turn off without warning. If you have recently added any new hardware, remove it from the computer to make sure it is not the cause of the problem. If you have not recently installed any new hardware into the computer, the next best solution is to systematically remove non-essential hardware.
