The framework within which an organization strives to meet its needs for information security is codified as security policy. A security policy is a concise statement, by those responsible for a system (e.g., senior management), of information values, protection responsibilities, and organizational commitment. One can implement that policy by taking specific actions guided by management ...

Question: I need to understand how to add a primary key constraint statement to make sure that all rows are unique. How is a primary key different than a unique index?. Primary Key Constraints. Primary key constraints perform the same thing as a unique index in the sense that a primary key constraint makes a unique index to enforce the unique values within the data column.

Primary Key Constraint Tips - Burleson Oracle Consulting

Bio-inspired computing, short for biologically inspired computing, is a field of study that loosely knits together subfields related to the topics of connectionism, social behaviour and emergence. It is often closely related to the field of artificial intelligence, as many of its pursuits can be linked to machine learning. It relies heavily on the fields of biology, computer science and mathematics.

Bio-inspired computing - Wikipedia

OS/2 is a series of computer operating systems, initially created by Microsoft and IBM under the leadership of IBM software designer Ed Iacobucci. As a result of a feud between the two companies over how to position OS/2 relative to Microsoft's new Windows 3.1 operating environment, the two companies severed the relationship in 1992 and OS/2 development fell to IBM exclusively.
