It is a truth universally acknowledged that the two most prestigious science journals in the world are Science, published in the U.S., and Nature, published in England. One would think, then, that their science reporting would be more accurate than the slipshod stuff you see in the science pages of the major media (the NYT is an exception). But Science slipped up this time when reporting on the ...

The best chance of success in eliminating the effects of the most difficult conditions, amblyopia or constant strabismus, occurs before the age of two. However, this does not preclude excellent success in many older patients and at least partial success in most patients older than 6 years of age. There are numerous studies that demonstrate that treatment after the age of 6 is very successful.
