Hi I've successfully created a working 1809 LTSC gold image and got sysprep to run properly but when I restore the image via WDS with my answer file it takes over 90 minutes before the image gets to the login screen. In times gone by it's because I've got the .xml file wrong somewhere but in this case I can't see what the issue might be?

Hate to be the bearer of bad news, but no, still 3.0.0.0 in that location. Further more the auto update function is broken. :-) If you look past the fact that you've must of included a debug version with a lot of informative dialogs, the only thing that that one does is deleting the old one but failed to install the new one.
