For servers without CD drive or remote KVM you might want to use an USB Flash Drive to install ESXi to the hardware. This post explains how to create a bootable ESXi Installer USB Flash Drive in less than 2 minutes. The Flash Drive will work totally identical to an Installable CD ...

Create a Bootable ESXi Installer USB Flash Drive | Virten.net

Hate to be the bearer of bad news, but no, still 3.0.0.0 in that location. Further more the auto update function is broken. :-) If you look past the fact that you've must of included a debug version with a lot of informative dialogs, the only thing that that one does is deleting the old one but failed to install the new one.

I was going sysprep a base image of Windows Server 2008 this morning and followed my own instructions on sysprepping Windows. I went to the installation DVD and couldn't find sysprep. A quick google later and a bit of poking around revealed that sysprep is now installed by default on Windwos Server 2008.

How to Sysprep Windows Server 2008 - James Kovacs' Weblog

In this post we will see the steps to capture windows 7 using SCCM 2012 R2. This post is different from the one which shows the steps to build and capture the operating systems using SCCM 2012 R2. We will not be using build and capture approach here rather we will capture a reference operating system, i.e. capture windows 7 using SCCM 2012 R2 and we will also see how to deploy the same using ...
