This update is a cumulative rollup of previous fixes, and it resolves the following issues:

Update rollup for Visual Studio 2010 Tools for Office Runtime

Visual Studio 2010 includes a visual Query Designer that you can use to design queries. Visual Studio 2010's Query Designer is almost identical to SSMS's Query Designer. You can run Visual Studio 2010's Query Designer by opening Server Explorer, right-clicking the database connection node, and selecting New Query from the context menu.
