In physics, assuming a flat Earth with a uniform gravity field, and no air resistance, a projectile launched with specific initial conditions will have a predictable range.. The following applies for ranges which are small compared to the size of the Earth. For longer ranges see sub-orbital spaceflight.The maximum horizontal distance traveled by the projectile, neglecting air resistance, can ...

Notice that in our development of Debye shielding we used  $n_e$  as the charge density and supposed that it could be taken as smooth and continuous. However if the density were so low that there were less than approximately one electron in the Debye shielding region this approach would not be valid.
