Control theory in control systems engineering is a subfield of mathematics that deals with the control of continuously operating dynamical systems in engineered processes and machines. The objective is to develop a control model for controlling such systems using a control action in an optimum manner without delay or overshoot and ensuring control stability.

Bone erosion is a frequent manifestation of chronic tophaceous gout (1-3). These areas of matrix destruction are usually found in close proximity to intraarticular tophi, as well as in foreign body granulomas of chronic inflammatory cells and connective tissue, surrounding collections of monosodium urate monohydrate (MSU) crystals (). Over time, these pathologic changes may lead to joint damage ...
