Exam Test Banks and Solution Manuals

Simultaneous equation models are a type of statistical model in the form of a set of linear simultaneous equations. They are often used in econometrics. One can estimate these models equation by equation; however, estimation methods that exploit the system of equations, such as generalized method of moments (GMM) and instrumental variables estimation (IV) tend to be more efficient.

3.2. Measuring financial development. We measure annual equity market development and credit market development using the WDI database. According to Levine and Zervos (1998), Beck and Levine (2002), and Hsu et al. (2014), the ratio of stock market capitalization to GDP and the ratio of stock market traded value to GDP are used to reflect equity market development.
