Hi experts, I'm an excel amateur but I'm in the process of building a calculator of sorts for calculating the price of a solar system. I have a number of combobox's which refer to seperate sheets filled with data. Depending on the combobox selection, the price for that selection will be fetched from the appropriate sheet. So for instance, if I select a 1.5kW system as my "base system" it will ...

Hi to all, This is a great post. Im not quite experienced with VBA codes and was very easy to adapt to my needs. however I got a question: I replaced the numbers on the cells with a formula to adjust the max and min values, but when the formula changes the new value, it does not update on the chart, unless I double click-enter on each of the cells.
