A question I've been asked a lot lately is, "How do I make use cases work in an agile setting?" I found myself struggling for an answer because a) agile is a mindset not a methodology and b) I didn't think there was anything about use cases that prevented them from being used in an agile setting. So just do it.

I couldn't agree more. In some cases, I would even argue that there is an intermediate level of model, which is the workflow diagram. In common with the use case, it would describe the behaviour of the solution, but at a higher level.

Why Identify Business Processes and Use Cases?

In a recent post, I provided a definition of use case as well as an example.. The example I provided uses a very simple format. In most real-world projects, teams find it helpful to use a more fully-dressed format.. In this post, I share a use case template in a fully-dressed format, as well as a use case example using the template.
