According to the SEER cancer statistics, 1,658,370 persons will develop new cancers in 2015 and 589,430 will die from cancer. Compared to this, the number of new primary brain tumors (BT), 22,850 or 1.4%, is relatively small. However, if one adds metastases from other cancers to the brain, the number of BT increases significantly.

Tom Rath might well be what most people consider a prodigy. In spite of being diagnosed with a rare disease called VHL at the age of 16, he still went on to become a successful psychologist, who, after 13 years of leading Gallup's (the company who does all the polls) research and consulting for employee engagement, switched to an advisory role. ...

1. Introduction1.1. Senescence. Senescence was first described by Leonard Hayflick 50 years ago as a state in which normal cells divide for a finite number of times before they cease proliferation indefinitely (Hayflick, 1965, Hayflick and Moorhead, 1961), although they remain viable and metabolically active (Gey and Seeger, 2013). Senescence has been studied extensively using primary cells ...

Almost all aptamers selected through SELEX (systematic evolution of ligands by exponential enrichment) exhibit high affinity to targets with a dissociation constant ( $K_d$ ) in micromolar to nanomolar range. Therefore, aptamers are also called “chemical antibodies” (). Due to the lack of immunogenicity, aptamers are superior to antibodies and are attractive tools for various applications ...
