We want to help you find the answer to your question. After all, we are Answers.com! We just need a few more details from you so that we can help you find an accurate answer.

What questions do not have enough information to be ...

Let us say the actual_price is 100 units. The discount offered is 10%. discount is 10% of actual_price = 10% of 100 = 10 units. So the discounted price is actual_price - discount = 100 - 10 = 90. One important thing to notice here is that discount is always calculated on the actual price, which is basically called as MRP, maximum retail price. Let the discount percent is x%.

How to calculate a percentage discount - Quora
