The Erie Canal is a canal in New York, United States that is part of the east-west, cross-state route of the New York State Canal System (formerly known as the New York State Barge Canal). Originally, it ran 363 miles (584 km) from where Albany meets the Hudson River to where Buffalo meets Lake Erie. It was built to create a navigable water route from New York City and the Atlantic Ocean to ...

Buffalo, the second largest city in New York after New York City, is one of the world's great ports. Its importance rests on its canal connections to Albany and New York City, and through the Saint Lawrence Seaway to the north Atlantic. Its location at the southern end of the Niagara River also gives it access to the upper Great Lakes.
