Watchful waiting (also watch and wait or WAW) is an approach to a medical problem in which time is allowed to pass before medical intervention or therapy is used. During this time, repeated testing may be performed.. Related terms include expectant management, active surveillance and masterly inactivity. The term masterly inactivity is also used in nonmedical contexts.

Diet is the brick and mortar of health. This web page lays out some often-ignored principles of feline nutrition and explains why cats have a better chance at optimal health if they are fed canned food (or a balanced homemade diet) instead of dry kibble.. Putting a little thought into what you feed your cat(s) can pay big dividends over their lifetime and very possibly help them avoid serious ...
