Major industrial polymers - Unsaturated polyesters: Unsaturated polyesters are linear copolymers containing carbon-carbon double bonds that are capable of undergoing further polymerization in the presence of free-radical initiators. The copolyesters are prepared from a dicarboxylic acid or its anhydride (usually phthalic anhydride) and an unsaturated dicarboxylic acid or anhydride, along with ...

History and name. The name prostaglandin derives from the prostate gland, chosen when prostaglandin was first isolated from seminal fluid in 1935 by the Swedish physiologist Ulf von Euler, and independently by M.W. Goldblatt. Prostaglandins were believed to be part of the prostatic secretions, and eventually was discovered to be produced by the seminal vesicles.
