Understanding the water cycle, for kids, is the first step towards understanding earth science. The hydrologic cycle, or water cycle, essentially explains the processes water goes through to get from evaporation to rain to our drinking water.

Water Cycle for Kids | LoveToKnow

What happens in the natural water cycle? The natural water cycle uses physical processes to move water from the surface of the earth to the atmosphere and back again. Evaporation is when the sun shines on water and heats it, turning it into gas called water vapour which rises into the air.; Transpiration is when the sun warms people, plants and animals and they release water vapour into the air.

Natural water cycle - Sydney Water

Water moves. It goes from the land to the air. Then it moves back to the land. This movement is called the water cycle. Lakes,...
