Note: References to resources are supported only in reference types. Using a resource reference in any other type results in an exception. If an argument type supports null values, you can declare a default value of null by using `android:defaultValue="@null"`. When you choose one of the custom types, the Select Class dialog appears and prompts you to choose the corresponding class for that type.

When a company buys new land, it is important to consider the property's suitability to house a server environment. Failing to do so often means having to spend more on Data Center infrastructure, either to add what's missing or to overcome shortcomings on the site. The most desirable type of location is one that supports the Data Center's mission to safeguard server equipment and accommodate ...
