Whole foods are plant foods that are unprocessed and unrefined, or processed and refined as little as possible, before being consumed. Examples of whole foods include whole grains, tubers, legumes, fruits, vegetables.. There is some confusion over the usage of the term surrounding the inclusion of certain foods, in particular animal foods.

Science has shown that stress is incredibly bad for overall health. People who are late typically feel less stressed, unconcerned with deadlines, and generally more relaxed. That can lead to lower blood pressure, lower risks of heart disease, greater cardiovascular health, lower risk of stroke, and lower chance of depression, all of which can prolong life.
