There is a way to tell. You might remember from maths class that the three angles of a triangle add up to exactly 180 degrees. Actually your teachers left out a crucial point: this is only true on a flat surface. If you draw a triangle on the surface of a balloon, its three angles will add up to more than 180 degrees.

Why Is There Something, Rather Than Nothing? Sean M. Carroll. It seems natural to ask why the universe exists at all. Modern physics suggests that the universe can exist all by itself as a self-contained system, without anything external to create or sustain it. But there might not be an absolute answer to why it exists.

A Universe from Nothing: Why There Is Something Rather than Nothing is a non-fiction book by the physicist Lawrence M. Krauss, initially published on January 10, 2012 by Free Press. It discusses modern cosmogony and its implications for the debate about the existence of God.

### **A Universe from Nothing - Wikipedia**

‘Why is there something rather than nothing?’ is not about the origin of the world. Increasing the scientific respectability of the creation story (as with the Big Bang hypothesis) would still leave Heidegger objecting that the wrong question is being addressed.

### **Nothingness (Stanford Encyclopedia of Philosophy)**

The reason that anything exists and there is something rather than nothing, is because God made it. Without God creating, nothing would exist. Let me expand on this. That which exists (like the universe and everything in it) has existed forever or it is not the case that it has existed forever. In ...
