In chemistry, resonance is a way of describing bonding in certain molecules or ions by the combination of several contributing structures (or forms, also variously known as resonance structures or canonical structures) into a resonance hybrid (or hybrid structure) in valence bond theory. It has particular value for describing delocalized electrons within certain molecules or polyatomic ions ...

Resonance (chemistry) - Wikipedia

Abiogenesis, or informally the origin of life, is the natural process by which life has arisen from non-living matter, such as simple organic compounds. While the details of this process are still unknown, the prevailing scientific hypothesis is that the transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular ...

Waksman, Selman Humus (1936) . The basic text on the topic for decades; a summary of everything known in the mid 1930s. Waksman, Selman A. Principles of Soil Microbiology (1927) . Waksman's massive work of scholarship was refused by many publishers who thought there was no market for such a book, but it became a best-seller and dominated the field for decades.
