The analytical effect of the number of events per variable (EPV) in a proportional hazards regression analysis was evaluated using Monte Carlo simulation techniques for data from a randomized trial containing 673 patients and 252 deaths, in which seven predictor variables had an original significance level of $p < 0.10$. The 252 deaths and 7 variables correspond to 36 events per variable ...

Importance of events per independent variable in ...

This book will teach you how to do data science with R: You'll learn how to get your data into R, get it into the most useful structure, transform it, visualise it and model it. In this book, you will find a practicum of skills for data science. Just as a chemist learns how to clean test tubes and stock a lab, you'll learn how to clean data and draw plots—and many other things besides.

7 Exploratory Data Analysis | R for Data Science

1. Introduction. The debate on trade-growth nexus is not new. The view that trade enhances economic growth and welfare has a long history. As far back as the 16th century, Smith (1776) emphasised trade as a vent for surplus production and a means of widening the market. In the same vein, Marshall (1890) acknowledged that causes which determine economic progress of nations belong to the study ...

A 'Thematic map' is a map that focuses on a specific theme or subject area. This is in contrast to general reference maps, which regularly show the variety of phenomena—geological, geographical, political—together. The contrast between them lies in the fact that thematic maps use the base data, such as coastlines, boundaries and places, only as points of reference for the phenomenon being ...

x Acute allograft rejection (AAR) is a complex and multifactorial phenomenon that strongly predicts poor prognosis following heart transplantation [1]. Early diagnosis of AAR plays a key role in the management of post-transplant patients, enabling to promptly tailor a more intensive follow-up, and a more gradual weaning from immune-suppressants [2].
