The Unix system is composed of several components that were originally packaged together. By including the development environment, libraries, documents and the portable, modifiable source code for all of these components, in addition to the kernel of an operating system, Unix was a self-contained software system. This was one of the key reasons it emerged as an important teaching and learning ...

YACC Grammars as Specifications. The Single UNIX Specification describes certain functionality and ``little" languages with yacc grammars. The yacc utility (Yet-Another-Compiler-Compiler) is used to build language parsers, and the syntax of the yacc input language is designed for describing languages. Because of this, and its familiarity in the community, it has been used in the Single UNIX ...
