PHYS 161. Black Holes (4) An introduction to Einstein's theory of general relativity with emphasis on the physics of black holes. Topics will include metrics and curved space-time, the Schwarzschild metric, motion around and inside black holes, rotating black holes, gravitational lensing, gravity waves, Hawking radiation, and observations of black holes.

Physics Courses - University of California, San Diego

Physics (from the Ancient Greek φύσις physis meaning "nature") is the fundamental branch of science. The primary objects of study are matter and energy. Physics is, in one sense, the oldest and most basic academic pursuit; its discoveries find applications throughout the natural sciences, since matter and energy are the basic constituents of the natural world.

History of physics - Wikipedia

Discover your community Amarillo College has aligned its programs of study with academic communities that not only correspond with career endorsements supported by Texas High Schools, but also ideally serve returning and transfer students.
