In your own words, describe what effect cooling has on the frequency at which particles of reactants ... a substance that causes or accelerates a chemical reaction without itself being affected.

Factors Affecting the Rate of Chemical Reactions Worksheet

A chemical reaction, such as cooking an egg is an irreversible change, because we cannot bring the egg back to its original raw state. A physical change is one that can be reversed; for example, we can boil water and then let it cool again. This is called a reversible change. Chemical reactions are irreversible changes.
