This page profiles water-treatment schemes other than those involving permanent magnets or magical "catalysts". All of these I consider "dubious" in the sense that there is no credible evidence in the reputable scientific or engineering literature that these devices work, and in most cases there is no reason, based on present scientific knowledge, to believe that they even can work.

For over seven decades Amtrol has provided solutions for water systems, and the 500-20 is no exception. This water hammer arrestor can silence banging or vibrations in your pipeline by absorbing the hydraulic shock typically associated with fluid or pressure waves in the pipe. 500-20's butyl rubber diaphragm absorbs the inertia created by the moving water, which quiets the noise.
