Feminism and Race in the United States. This article traces the history of U.S. mainstream feminist thought from an essentialist notion of womanhood based on the normative model of middle-class white women's experiences, to a recognition that women are, in fact, quite diverse and see themselves differently.

A race is a grouping of humans based on shared physical or social qualities into categories generally viewed as distinct by society. First used to refer to speakers of a common language and then to denote national affiliations, by the 17th century the term race began to refer to physical (phenotypical) traits. Modern scholarship regards race as a social construct, an identity which is assigned ...
