Why Buildings Stand Up: The Strength of Architecture. In the Afterword, he also addresses advances in science and technology that have had important effects on the planning and construction of buildings: improved materials, progress in antiseismic designs, and the revolutionary changes in both architectural and structural design made possible by the computer. Soft cover, 323 pages.

Why Buildings Stand Up | Salvadori Center

How buildings balance forces. The force then channels down through the walls to the floor. The force of the walls pushing down on the floor is exactly balanced by an equal force when the floor pushes up on the wall. If that weren't the case, and the two forces weren't exactly balanced, either the walls or the floor would be moving.
