The George Mateljan Foundation is a not-for-profit foundation with no commercial interests or advertising. Our mission is to help you eat and cook the healthiest way for optimal health.

How Does Digestion Work and How Can I Improve Mine ...

Stomach acid is critical to the bodies overall health. It protects the body from infection, breaks down food clumps so the vital nutrients can be absorbed, and triggers the lower esophageal sphincter to close, thus preventing reflux and heartburn. Stomach acid suppression drugs and antacids or introduce side effects similar to the symptoms of a disease called Achlorhydria (no stomach acid).

The Importance of Stomach Acid - Reflux Defense

Upon heating, Δ^9 -Tetrahydrocannabinolic acid decarboxylates to give the psychoactive compound Δ^9 -Tetrahydrocannabinol. When cannabis is heated in vacuum, the decarboxylation of tetrahydrocannabinolic acid (THCA) appears to follow first order kinetics. The log fraction of THCA present decreases steadily over time, and the rate of decrease varies according to temperature.

Decarboxylation - Wikipedia

Shutterstock. Water helps to plump up your skin, so you should be able to imagine what dehydration will do! When you don't drink enough water, the collagen begins to crack and bind together, causing fine lines and wrinkles to get more noticed.

How do strong and weak acids differ? Use lab tools on your computer to find out! Dip the paper or the probe into solution to measure the pH, or put in the electrodes to measure the conductivity. Then see how concentration and strength affect pH. Can a weak acid solution have the same pH as a strong acid solution?

Acid-Base Solutions - Acids | Bases | Equilibrium - PhET ...

The typical reactions of these compounds are substitutions -- replacing one of these heteroatoms by a another atom. Here's an example: The chlorine of the acyl chloride has been replaced by the -OCH₂CH₃, more specifically by the oxygen atom of that group. This type of reaction, in which an atom or group is replaced by another atom or group, is called a substitution reaction.

Carboxylic Acid Derivatives

sometimes referred to as lactic acid). In plant and yeast cells pyruvate is converted into carbon dioxide and a type of alcohol called ethanol.
