Remote Debugging a C# or Visual Basic project in Visual Studio. 08/14/2018; 8 minutes to read; Contributors. all; In this article. To debug a Visual Studio application that has been deployed on a different computer, install and run the remote tools on the computer where you deployed your app, configure your project to connect to the remote computer from Visual Studio, and then run your app.

Remote Debug a C# or VB project - Visual Studio ...

After slogging around Visual Studio I finally figured out the answer that took far longer than it should have. In order to take an existing project without source control and put it to an existing EMPTY (this is important) GitHub repository, the process is simple, but tricky, because your first inclination is to use the Team Explorer, which is wrong and is why you're having problems.

Git in Visual Studio - add existing project? - Stack Overflow

I have a few dll files in \lib folder of my project folder. In the property page of dll, I have selected "Build Action" as "Content" and "Copy to Output Directory" as "Copy always". After build I am
