User Need Analysis

Introduction. User-centered design, according to Katz-Haas, is really about defining who the users are, defining their tasks and goals, their experience levels, what functions they want and need from a system, what information they want and need and understanding how the users think the system should work. User-centered design has also been linked to the identification of required job ...

How To Quantify The User Experience — SitePoint

DIVA-2.0 allows the modeling of single-zone thermal models using EnergyPlus. These models are automatically linked, through the software interface, with detailed lighting and shading schedules generated by DIVA/DAYSIM. In effect, this allows one to test the relative effect of different daylighting and controls strategies on the energy consumption of a typical daylit space.
