peppered moth lab - University of Notre Dame

Play the part of a predatory bird hunting for moths in the forest. A wonderful activity that shows how different camouflage leads to selective predation and so to a change in the population. Depending on whether you choose to hunt in a pre-industrial or post-industrial forest you will find either the dark moth or the light moth easier to catch.

eChalk: Peppered moth natural selection simulation

BIOLOGY LAB. PEPPERED MOTH. SIMULATION. Industrial melanism is a term used to describe the adaptation of a population in response to pollution. One example of rapid industrial melanism occurred in populations of peppered moths in the area of Manchester, England from 1845 to 1890. Before the industrial revolution, the trunks of the trees in the ...
