Welcome to the second blog post about Swimming Naked. On 2016/08/15 I posted a Frank Answer About Swimming Naked. That article was a response to a negative comment about the practice made by a retired male teacher who took my Bennett High School class of 1961 on a tour of the old high school at a class reunion.

Basically a cylinderhead pressure tester is to check if your top has a crack that allows combustion gasses to enter into the cooling system. Usually a warped head lets gases into the coolant but if you've checked that the head is level, allowing the head gasket to seal correctly, then a pressure test is needed to see if there is a leak.
