The cells in our bodies are in constant flux through the processes of osmosis and diffusion. Learn about how saturation levels force change, and why we're lucky they do.

The accepted spelling is 'sulfate' but very few people are aware of this, and most textbooks still use the old spelling 'sulphate'. When working with copper sulfate, as with most chemicals, safety precautions must be adhered to, such as wearing safety goggles and avoiding contact with the skin, eyes and nasal passages.

Rain water contains particulates from airborne dust. The amount of particulates will vary greatly based on the weather. A sample from a brief intense storm after a dry period would give you more particulates than a sample taken in the middle of several days of rain.

a/ Of which 50% Protein Selco® and 50% Culture Selco®: Calculate the daily amount, distribute before the inoculum 100 g of it (100 ppm in a 1-m 3 tank), then divide the remaining quantity into three rations, using the same proportion for the whole day 0, at 4 and 10 pm and 2 am. b/ Replace Culture Selco® by Protein or DHA Protein Selco®. c/ 1/3 of the harvest is used to inoculate other ...
