Developmental psychology is the scientific study of how and why human beings change over the course of their life. Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire lifespan. Developmental psychologists aim to explain how thinking, feeling, and behaviors change throughout life.

Political psychology is an interdisciplinary academic field dedicated to understanding politics, politicians and political behavior from a psychological perspective. The relationship between politics and psychology is considered bi-directional, with psychology being used as a lens for understanding politics and politics being used as a lens for understanding psychology.

Evolutionary Psychology. In its broad sense, the term "evolutionary psychology" stands for any attempt to adopt an evolutionary perspective on human behavior by supplementing psychology with the central tenets of evolutionary biology. The underlying idea is that since our mind is the way it is at least in part because of our evolutionary past, evolutionary theory can aid our understanding not ...

Analytical psychology distinguishes between a personal and a collective unconscious. The basic assumption is that the personal unconscious is a potent part—probably the more active part—of the normal human psyche. Reliable communication between the conscious and unconscious parts of the psyche is necessary for happiness.
