LimitState:SLAB is the only commercially available software to systematically automate the well-known yield-line analysis method for concrete slabs, allowing the ultimate load capacity and critical failure mechanism to be calculated in seconds.. Find out more about yield-line analysis using LimitState:SLAB or book a place on one of our technical webinars.

A tunnel is an underground passageway, dug through the surrounding soil/earth/rock and enclosed except for entrance and exit, commonly at each end. A pipeline is not a tunnel, though some recent tunnels have used immersed tube construction techniques rather than traditional tunnel boring methods.. A tunnel may be for foot or vehicular road traffic, for rail traffic, or for a canal.
