That is absolutely insane! Excel is over 8 times as long to refresh the same data! Imke Feldman made a mention of this in her blog post Performance difference between Excel and PowerBI with M is huge! While the angle of her post is very much how impressed she is with Power BI, I have to ask the opposite question: Why does Excel Power Query performance suck so badly?

Does Fasted Cardio Help You Lose Fat Faster? The reason people believe fasted cardio increases fat loss has to do with insulin. Insulin does more than just shuttle nutrients into cells—it also impairs the breakdown of fatty acids. That is, the higher your insulin levels are, the less your body is going to use fat for energy (both body fat and dietary fat).
