Why We Read Fiction Theory

This the fourth instalment in a series of essays by Matt McManus examining the work and legacies of the totalitarian philosophers. In *Ecce Homo*, the autobiographical self-examination written shortly before his descent into madness on the streets of Turin in 1889, Nietzsche cheekily opined that he was a "destiny." It must have seemed like an almost tragic act of self-aggrandizement at the time.

Gregory Currie, a professor of philosophy at the University of Nottingham, recently argued in the *New York Times* that we ought not to claim that literature improves us as people, because there is no "compelling evidence that suggests that people are morally or socially better for reading Tolstoy" or other great books. Actually, there is such evidence.

The simulation hypothesis or simulation theory proposes that all of reality, including the Earth and the universe, is in fact an artificial simulation, most likely a computer simulation. Some versions rely on the development of a simulated reality, a proposed technology that would seem realistic enough to convince its inhabitants the simulation was real.
