Hair, teeth, height--even those pesky allergies! Learn how all of these are part of your genetic inheritance.

Genetics - BrainPOP

Genetics is the study of heredity and variation in organisms. We begin with a study of the monohybrid cross, invented by Mendel. In a monohybrid cross, organisms differing in only one trait are crossed.

Monohybrid Cross Problem Set - The Biology Project

Hi! I'm Mr. W. Thanks for coming to my website! You might know me from my songs about biology. Most of what I'm doing these days is working on an interactive biology curriculum for first-year college and AP Bio students. Click on the "AP Bio" tab above or any of the units below to see what I've put together for you or your students.

The theories developed in the early 20th century to integrate Mendelian genetics with Darwinian evolution are called the modern synthesis, a term introduced by Julian Huxley.. Evolutionary biologists have subsequently modified this concept, such as George C. Williams' gene-centric view of evolution. He proposed an evolutionary concept of the gene as a unit of natural selection with the ...

Mendelian Genetics - California State University, Northridge

In molecular biology, transformation is the genetic alteration of a cell resulting from the direct uptake and incorporation of exogenous genetic material from its surroundings through the cell membrane(s). For transformation to take place, the recipient bacteria must be in a state of competence, which might occur in nature as a time-limited response to environmental conditions such as ...

The Biology Project, an interactive online resource for learning biology developed at The University of Arizona. The Biology Project is fun, richly illustrated, and tested on 1000s of students. It has been designed for biology students at the college and high school level, but is useful for medical students, physicians, science writers, and all types of interested people.

The Biology Project

Inpatient Pediatric Rehabilitation. The Children's Hospital Rehabilitation Unit, or CHRU, provides comprehensive pediatric inpatient rehabilitation care for patients of UPMC Children's Hospital of Pittsburgh.. The CHRU is at The Children's Home of Pittsburgh & Lemieux Family Center on Penn Avenue. It's less than one mile from the main campus of Children's Hospital.

Children's Hospital Rehabilitation Unit (CHRU) | Children ...

All cancer is caused by gene changes building up inside a cell. Those changes (gene mutations) happen in several ways. Some gene mutations are caused by factors outside the body (exposures), some happen during normal cell division, and we are born with some gene mutations.

Hereditary Cancer

Mark Wilkinson, of the Department of Zoology, The Natural History Museum, London, U.K. (marw (at) nhm.ac.uk) has produced TAXEQ3, a program to carry out Safe Taxonomic Reduction, which means dropping some species to get a set whose phylogenetic relationships are less ambiguous. The method is described in a paper: Wilkinson, M. 1995. Coping with abundant missing entries in phylogenetic inference ...

A growing body of research suggests that genetics play a role in our taste preferences. Growing up, my sister liked to eat the salt that gathers at the bottom of bags of pretzels. She still craves salty foods, and so does her 3-year-old son. On the other hand, I've had a lifelong sweet tooth, like ...
