Due to the threat of Boxwood Blight, Rose Rosette and other serious pest/disease issues, the Garden is no longer allowing plant samples to be brought in for identification or diagnosis. These problems can spread to the garden displays and severely impact our living plant collection.

Help for the Home Gardener - Missouri Botanical Garden

A pup is the offset of another bromeliad plant. Pups can form at anytime but this most often occurs after your bromeliad has bloomed. Once a mature bromeliad reaches the point where it has a healthy bloom and a strong core, the original plant (known as the mother) will stop producing leaves and will begin producing its next generation of plants.
