Last month we published a blog post about setting up specific network conditions for software testing. In that blog post we shared our knowledge on how to set up specific network conditions using built-in tools in your web browsers or operating systems and explained a more sophisticated solution based on a router.

Setting up Router Traffic Mirroring to Wireshark ...

The part that is most confusing about this is that Voice Routes have specific Priority settings that are assigned to them in PowerShell, which are used within a PSTN Usage to determine precedence and order of evaluation - however, this doesn't tell the full story. The order of the PSTN Usage then functions as an overarching ordering for the Voice Routes.

Cisco Identity Services Engine (ISE) has been drawing a lot of attention in the recent years. It is the product released by Cisco to promote identity-based network access security. The product is, by no mean, a standalone solution but merely a component of an architecture that requires collaboration of multiple network entities as a whole.
